

A story about having the nasal spray in school

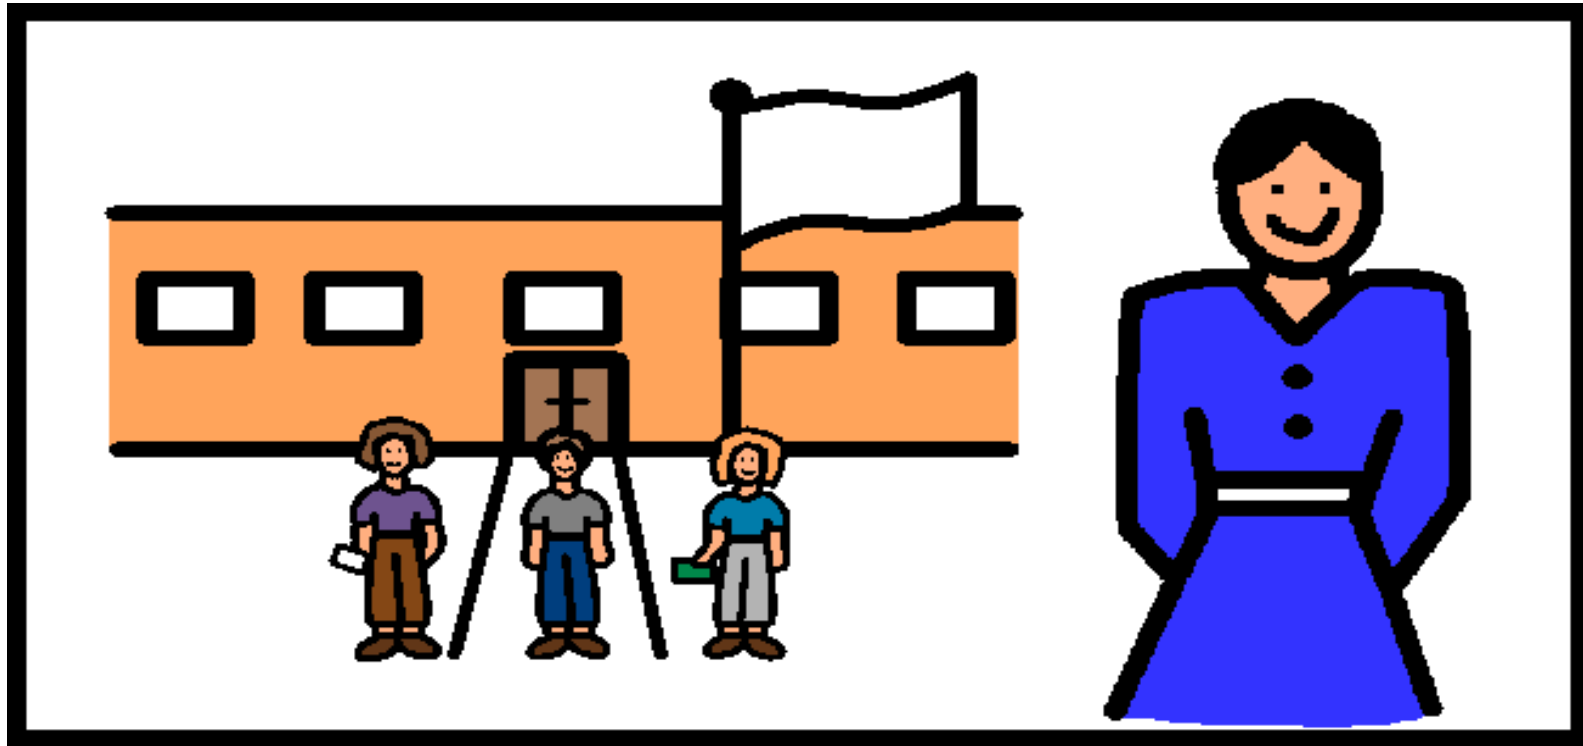

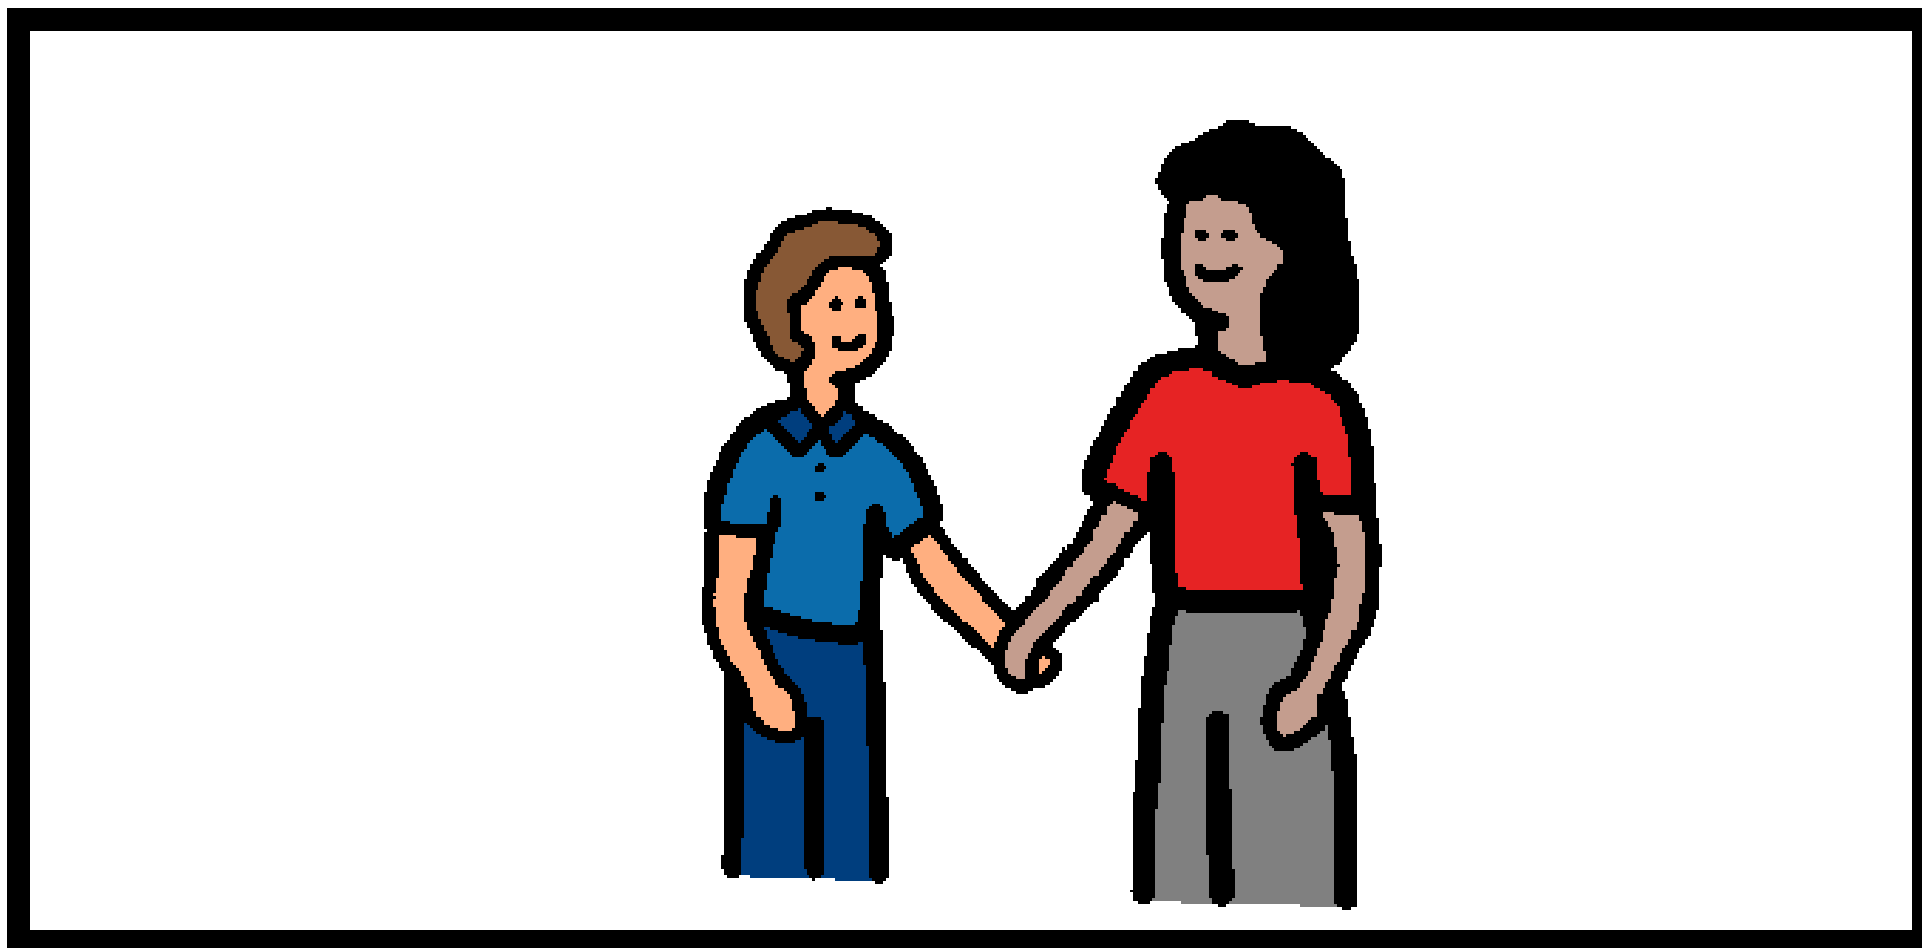

**Sometimes we need to have the
nasal spray**

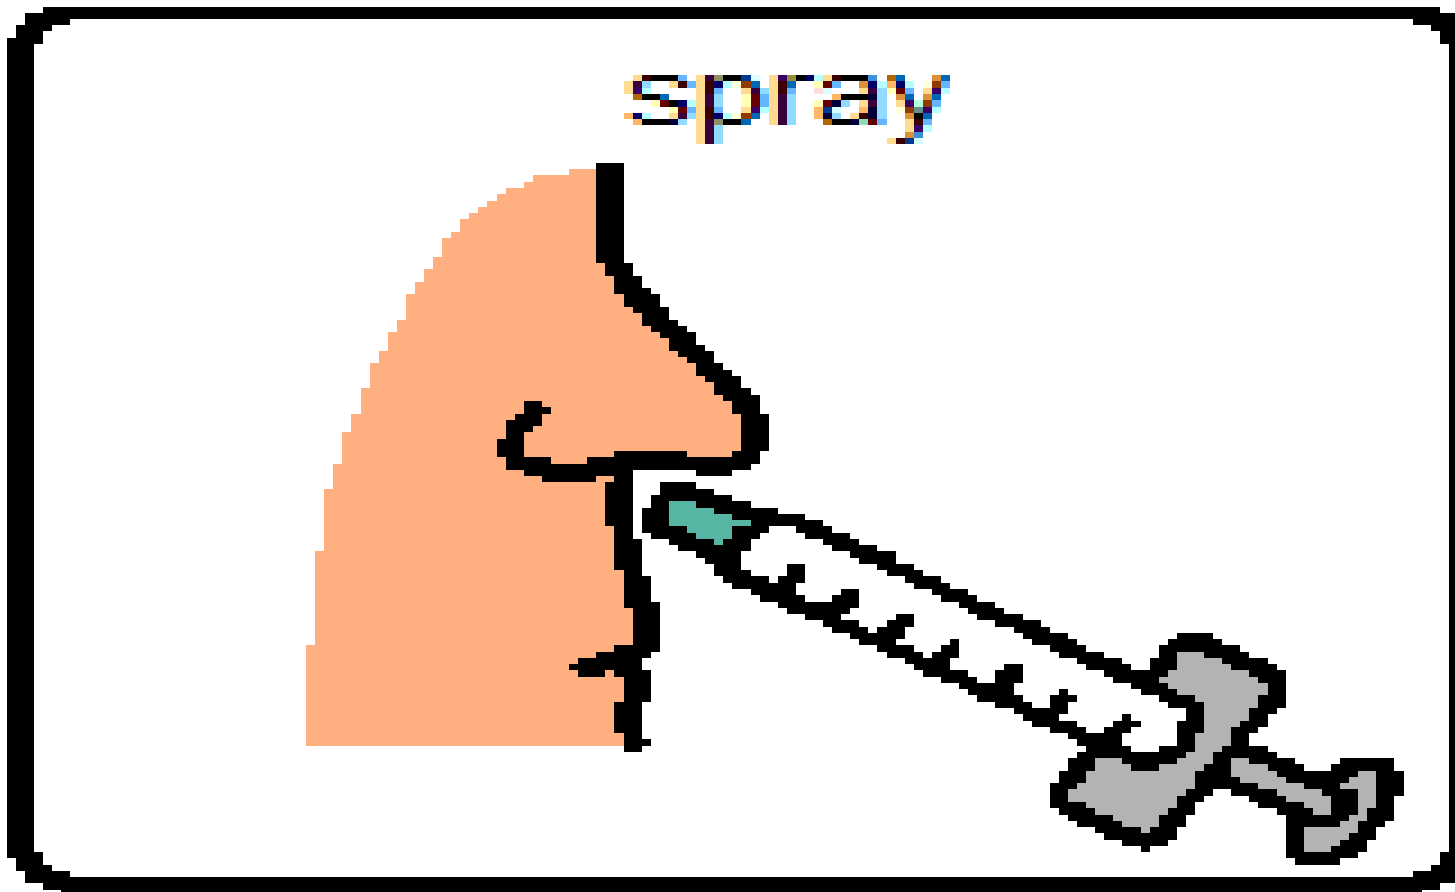

The nasal spray can stop us getting poorly.

Nurses and Doctors give the nasal spray. It takes just a few seconds to do.

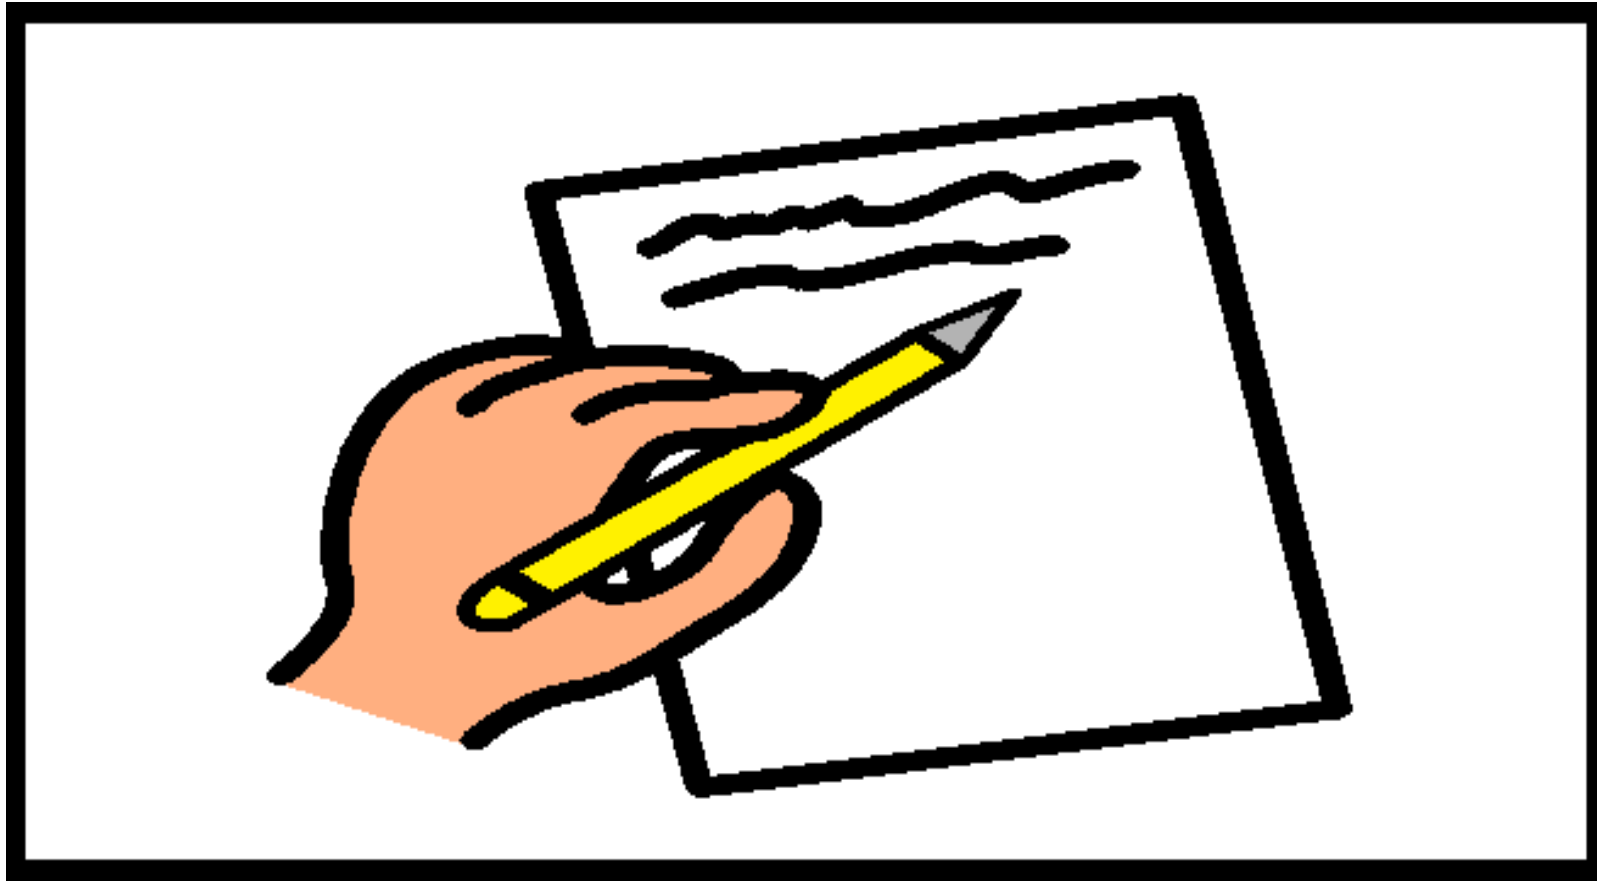

When it is time for my nasal spray I will be taken to the room by an adult.

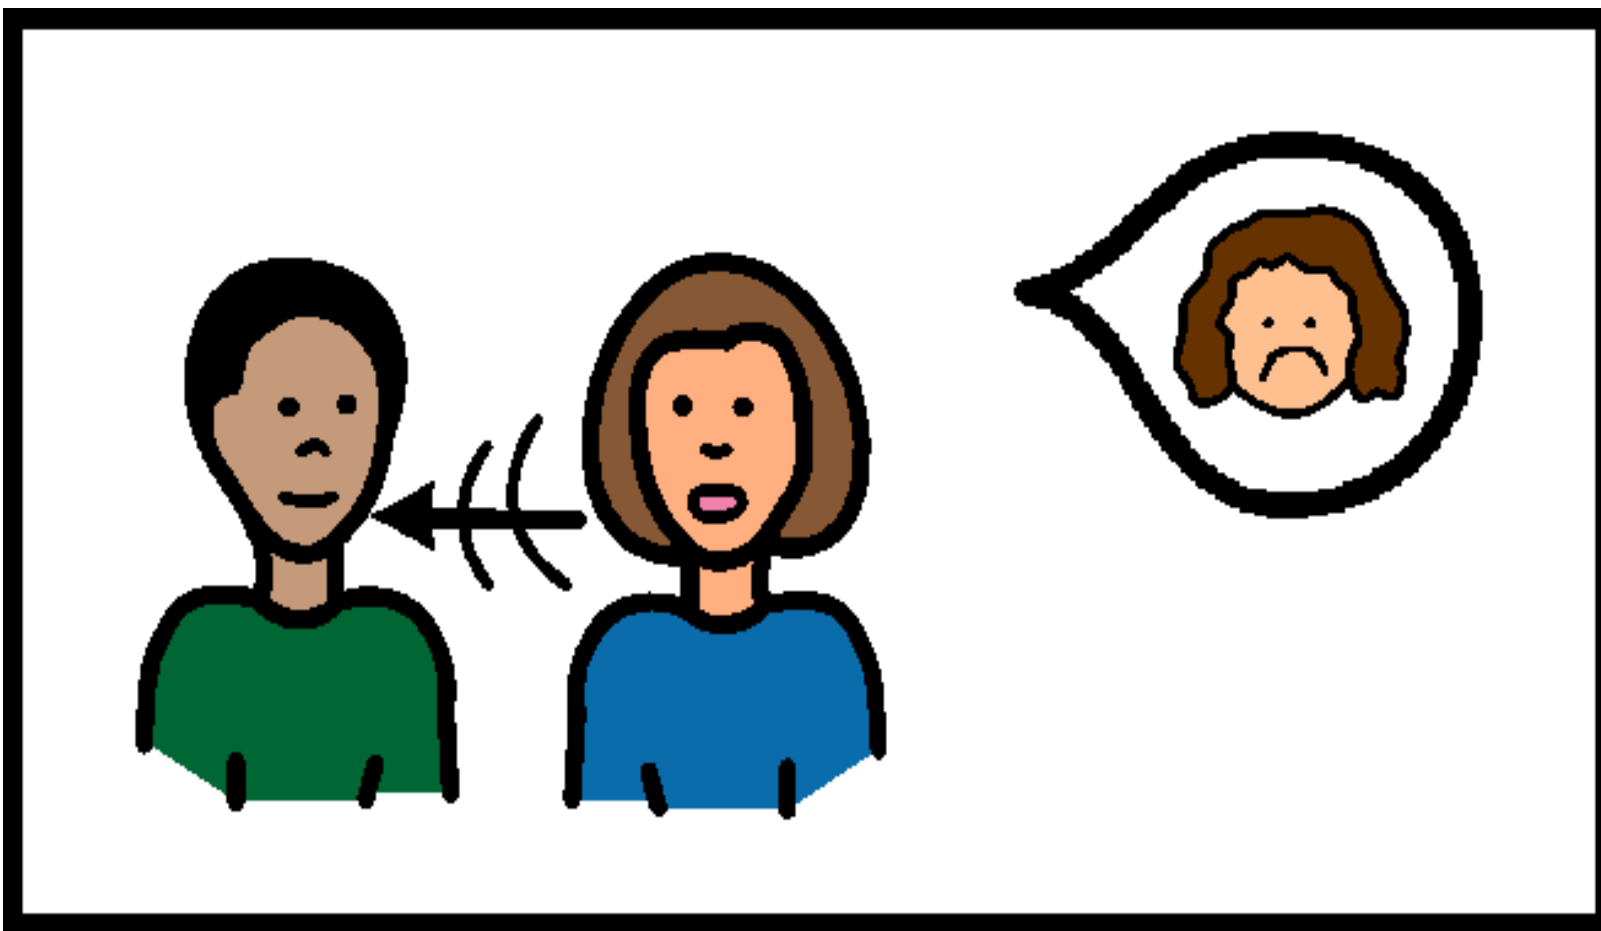

The nasal spray will go up my nose.

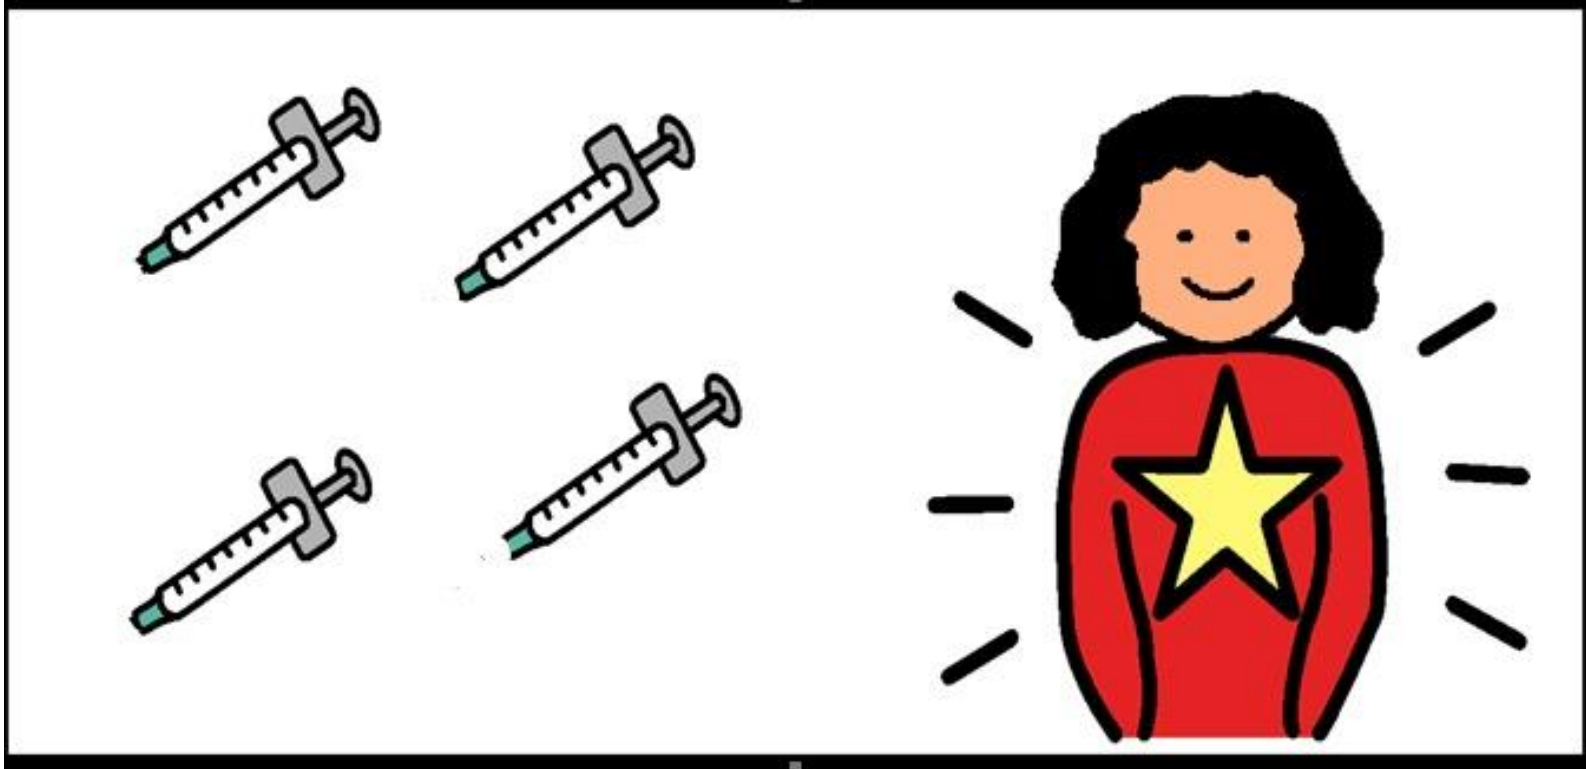

The nurse will give me my nasal spray.

The nurse will need to do some writing. When she is finished, I can go back to class.

If you feel strange or get a rash after the nasal spray tell an adult.

A nurse or doctor may give me another nasal spray at another time. It may not be the same person, having the nasal spray is ok.
